

Over Under Wheel Rules

How to Play

A player typically places a wager on one of three spaces. These spaces are:

- Under 7 (Usually pays 1-1)
- Over 7 (Usually pays 1-1)
- 7 (Usually pays 4-1)

For instance if you bet one dollar on under and the dealer rolls under, you gain a dollar as well as getting your dollar back. If the dealer rolls a seven and you bet on it, you make four dollars.

Once all the bets have been placed the attendant closes the betting board with a wire screen and then puts the dice through the chute. Players then get paid accordingly.
